Re: Carr 220 South Union Street, LLC  
Alexandria

Dear Mr. Miller:

Per your request, DEQ staff has reviewed the analytical groundwater and soil sampling data for the aforementioned project. The limited groundwater data was evaluated against the current Virginia Water Quality Standards. It is staff's best professional judgement that this construction dewatering activity would not cause, or reasonably be expected to cause, or contribute to a violation of water quality standards. This is solely based on the information provided on 21 October 2015.

Therefore, the construction dewatering activity at this site may be discharged under the *General VPDES Permit for Discharges of Stormwater from Construction Activities* (9VAC25-880 et seq.) as uncontaminated water per the conditions and requirements as set forth.

However, should the nature or characteristics of the discharge change or future regulations be promulgated and/or the water quality standards are revised; this discharge may require reevaluation at that time.

Please contact Douglas Frasier at 703-583-3873 or via email at [Douglas.Frasier@deq.virginia.gov](mailto:Douglas.Frasier@deq.virginia.gov) should you have any further questions.

Respectfully,

A handwritten signature in black ink, appearing to read "Bryant Thomas".

Bryant Thomas  
Regional Water Permits and Planning Manager
